Oakenhall Medical Practice is a well-established GP Surgery, which was modernised in 1992, comprising of 3 consulting rooms, 2 nursing rooms, administrative office spaces, patient waiting area and managers room. Oakenhall Medical Practice is practice owned. Oakenhall Medical Practice is also a training practice for medical students. The practice is located in the town centre with nearby parking. The

practice area primarily covers Hucknall, Bestwood Village and Linby, but also has some patients in Papplewick. Under the Health and Social Care Act 2008 (The Care Quality Commission (Registration) Regulations 2009 Part 4), the registering body (Oakenhall Medical Practice) is required to provide to the Care Quality Commission a statement of purpose.

Our Aims and Objectives

- We aim to ensure high quality, safe and effective services and environment.
- To provide monitored, audited and continually improving healthcare services.
- To provide healthcare which is available to a whole population and create a partnership between patient and health professional, which ensures mutual respect, holistic care and continuous learning and training.
- The provision of accessible healthcare which is proactive to health care changes, efficiency and development.
- To improve Clinical governance and Evidence Based Practice
- To improve Clinical and Non-clinical risk management including specific clinical risk areas, facilities and the environment
- To improve vigilance for unforeseen emergencies
- To optimize performance against key targets and core standards
- To meet key targets
- To become a patient centered organization and improve services offered to patients.
- To safeguard both children and vulnerable adults, by ensuring that all staff receive appropriate training.
- To improve communication between the surgery and the patients
- To recruit, retain and develop a highly motivated and appropriately skilled workforce.
- To enhance performance of the workforce
- To guide the employees in accordance with the Equalities Scheme
- To continue the development of the Practice
- To ensure effective management and governance systems
- To continue to develop a robust Information Technology strategy to support the Practice

Our practice ethos is to strive towards a partnership between patients and health professionals based on the following:

Mutual Respect

We endeavour to treat all our patients with dignity, respect and honesty. Everyone at Oakenhall Medical Practice is committed to delivering an excellent service. We encourage patients to highlight any discrepancies and to offer the same commitment in return.

Holistic Care

We treat patients and illnesses. This means that we are equally interested in the physical, psychological and social aspects of your individual care.

Continuity of Care

Building and maintaining a strong relationship between doctors, health professionals, and patients is essential to the way we work. This is especially so in the management of on-going problems or long-term illness. In these circumstances we would encourage you to continue to see the same health professional and wherever possible we will facilitate this through our appointments system.

However, if you have a new problem and the doctor or nurse that you normally see is not available, or you would like to see someone else then we would encourage you to see any of the doctors or nurses at the practice.

Learning and Training

We are a training practice and are committed to the training of medical students and nurses all of whom are closely supervised. We believe in life-long learning and all the health professionals here and administrative staff undergoes an annual appraisal where the goals of the individual, teams and practice are discussed and agreement is reached on the way forward. Regular reviews act as a way of reinforcing effective performance, highlight areas for improvement and recognise developing strengths.

We also recognise the benefit of supported learning for our patients and families in enhancing your ability to manage and deal with both self-limiting and long-term illnesses.
